Sunday, 21 September 2025 The original Concept was for the creation of an AI assistant that can serve as a productivity work space with AI capabilities. With the power of AI like Chatgpt, Genini or Claude. In priniciple I wanted an AI assistant that will replace my daily and weekly notes /calendar/tasks. In my role as a Senior production Engineer, there are many activities, tasks, projects, meetings, etc. So I have to keep track of all the time I'm spending and from each went/meeting/interaction, extract the key detail/information It must meet the following requirements: -(A) Send messages to the A I agent: El Voice notes D'text notes DI Images/pictures

Adocuments(pdf) (B), Daily start/end of day review of plan and privities Weekly, Monthly plans privities. C. Intégrate Schedule 1) Help with planning and prioritizing (E) Learn my methods and rowines progressively (F) Have my organisational Context De Page de Dog Structure, key people DEgnipment Kon departments \*Capital

\*Progress tradaing Key departments · Maintenance Key Sumbers

Key processes e.g. Capital

applications 0 H5 A2 1/2 o 19re all dows Key projects.

Dig Business Archegy Dafely Ducidents · Reputs o Andras a Risk Assessments (G) Second Brown. (H) Field visits inspections -> notes, pictures -> Inbox. Delings -> Key decisions, Actions.

(3) Action Tracker including assigned work to Sourcei Meeting/audit/els. -Organisation 2) What must happen rext ;->
"Create Task" . Schedule meeting, o Same doc/media in media folder \* tags, find links/back links DAILY PLANNING-/REVIEW:
-Ou or dialy basis we review the inbox and update tasklist and plan/prharities. -timilarly, on a weekly and monthly basis. at the end of the day we want an AI assistant the progressively understands my way of working as well as my company context. Platform review;
Had a look a number of options:

1) Chatapt + Projects

2) Genine + Google Cloud to keep track of all items /tasks/uploads.

3) Claude + MCP In the end I spted for (4) Obsydian + Cland Code.

yhis is a very plexible solution. Is based on text / mak down
files. Cland Code can do triage and maintain everything
in a vault.
